

JOSEPH ERIC ODENCRANTZ, Ph.D., P.E.
Water and Environmental Expert

Professional Areas of Practice

- Water Resources Impact Analysis and Water Supply Protection
- Groundwater, Surface Water, Sediment, Soil and Air Transport Process Evaluation
- Waste Water and Water Treatment Design, Management and Monitoring
- Advanced Physical, Chemical and Biological Remediation and Treatment
- Soil, Water and Air Assessment, Remediation and Monitoring
- Passive Soil Gas, Vapor Intrusion/Indoor Air Assessment and Decision-Making
- Cleanup Level Determination/Risk-Based Corrective Action/Risk Evaluation
- Site Closure, Monitored Natural Attenuation and Economics of Risk Reduction
- Regulatory Negotiations and Project Management
- Emergency Response and Media Relations

Dr. Joseph Odencrantz is a California-based environmental and water consultant with over twenty-five years of experience in the private/public sectors. Dr. Odencrantz is a water and environmental expert with a unique set of qualifications and experience that spans from traditional civil and environmental engineering to current state-of-the-art methods. Dr. Odencrantz founded Tri-S Environmental (Tri-S) in 1994 and continues to set new standards of excellence in the practice of water and environmental management. He directs routine and complex analysis, investigations, special projects, vapor intrusion evaluations, water treatment, waste water treatment and remediation projects on behalf of a variety of clients. He has extensive testifying experience as an expert witness.

Education

- 1992 Ph.D., Civil & Environmental Engineering, University of Illinois at Urbana-Champaign: *Area of Specialization-Groundwater and Environmental*
Dissertation Title: Modeling the Biodegradation Kinetics of Dissolved Organic Contaminants in a Heterogeneous Two-Dimensional Aquifer
- 1988 Completed The University of Waterloo Summer Hydrogeology Field School, Canada. A three-week applied program in which two graduate students from the United States are invited to attend each year.
- 1986 M.S., Civil Engineering, University of Illinois at Urbana-Champaign: *Area of Specialization-Water Resources Systems and Hydrology*
Masters Project Title: Experimental Investigation of Mass Exchange from Recirculating Regions of Rivers and Streams
- 1984 B.S., Civil Engineering, University of Maine at Orono.
Summer Cooperative Education Project Report Title: Effectiveness of Silt Fence at Reducing Sediment Load Through a Sensitive Salmon Spawning Area via Regression Analysis of Sediment Transport Data

Professional Positions

- Tri-S Environmental, Sensible Strategies and Solutions for the Environment, Principal Civil and Environmental Engineer, Newport Beach, California, 1994-present
- Kyoto University, Research Center for Environmental Quality Management, Visiting Scholar, January-June 2007
- Levine-Fricke: Engineers, Hydrogeologists & Applied Scientists-now Arcadis, Senior Civil Engineer, Irvine, California, 1990-1994
- University of Illinois at Urbana-Champaign, Department of Civil and Environmental Engineering, Graduate Research Assistant, Urbana, Illinois, 1984-1990
- Illinois State Water Survey, Research Assistant, Champaign 1985-1986
- Maine Department of Transportation, Location and Environment Division, Research Assistant, Augusta, Maine, 1983
- U.S. Geological Survey, Water Resources Division, Hydrologic Field Technician/Supervisor, Augusta, Maine, 1980-1982 and 1984.

Registrations

Registered Professional Civil Engineer, State of California

Registered Professional Engineer: State of Maine

Registered Professional Engineer, States of New York and Michigan-Inactive

Notable Projects

- City of Dallas, Texas:
Explorer Pipeline Break/Water Supply Response Consultant
- City of Los Angeles, California:
Gateway Center Parking Garage Dewatering System Project Design/Manager
- City of South Lake Tahoe, California:
Groundwater Expert
- City of Fryeburg, Maine:
Over-Pumping of Local Groundwater Consultant
- City of Punta Cana, Dominican Republic:
Seawater Intrusion Consultant
- William Lyon Homes, California:
Groundwater and Landslide Analysis Expert
- Atlas Galvanizing, California:
Stringfellow Superfund Site Expert
- Repsol, Spain:
Soil, Sediment and Groundwater Consultant for Europe and South America. Some refinery wastewater projects in Europe were implemented using FIDIC conditions of contract.
- Shell Exploration&Production, California:
Soil and Groundwater Expert on the Taper Site
- Coast Wholesale Florist, California:
Most Knowledgeable Person Testimony for Transport and General Operations

- Walnut Creek Manor, California:
Soil and Groundwater Consultant, Hookston Site
- Unocal, California:
Guadalupe Oil Field Volume Estimation Consultant

Editorial Boards

Associate Editor, *Journal of Remediation*-Wiley, 1997-present
Associate Editor, *Biodegradation*-Springer, February 2001-present
Reviewer, *Journal of Contaminant Hydrology*-Elsevier, 2000-present, Outstanding Reviewer Status-top 10th percentile in terms of number of reviews 2012-2014
Reviewer, *Journal of Air & Waste Management Association*, 2009-present
Associate Editor, *Environmental Forensics*-Taylor & Francis, January 2007-March 2009
Advisory Board/Editor, *Underground Tank Technology Update*-Department of Engineering Professional Development, Funded by U.S.E.P.A., University of Wisconsin-Madison, 1999-2006
Associate Editor, *Journal of Ground Water Monitoring and Remediation*, NGWA, 1997-2001
Associate Editor, *Journal of Ground Water*, NGWA, 1994-1996

Examples of Professional Experience

- Environmental and water expert for international arbitration cases on behalf of several prominent law firms, municipalities, oil companies and insurance organizations. These cases involved impacts to public and private water supply systems (groundwater and surface water), waste water treatment systems and the responsible party's previous knowledge of the fate, transport and taste/odor characteristics of organic compounds.
- Provided expert consulting services to Dallas Water Utilities (DWU), Dallas, Texas in response to the largest surface water impact of MTBE in United States history. Designed and managed the collection of data from surface water, soil and sediments in an effort to track gasoline components released from a substantial pipeline rupture. Participated in numerous public meetings on DWU's behalf in an effort to keep the citizens of Dallas informed of the risk to their water supply and treatment systems.
- Designed and managed a groundwater dewatering and treatment system as part of the construction of the second largest subterranean parking structure west of the Mississippi River and a forty-story tower. The primary goal of the project was to lower the groundwater table 20 feet over approximately ten acres and keep the water level down for a two year period. Located in Los Angeles, the 1.2 million gallons per day Gateway Center Water Treatment Plant consisted of extensive pH adjustment, hydrogen peroxide addition for hydrogen sulfide removal and UV oxidation/activated carbon for trace petroleum hydrocarbons and chlorinated solvent removal. A prototype hydrogen peroxide control system was implemented to minimize the hydrogen peroxide usage. A Catellus Development Corporation and Rapid Transit District of Los Angeles project.

- Directed the Carson Regional Groundwater Group's Groundwater and Hydrocarbon Model (CRGGCAD) calibration (Wilmington-Carson, California). The CRGGCAD model consisted of a groundwater flow model, a hydrocarbon flow model and a dissolved phase transport model that interfaces with a comprehensive database from four oil refineries and one distribution terminal. The model consists of a 30 square mile regional model that communicates to five smaller scale model domains (1.5 square miles) through boundary conditions. The calibration of CRGGCAD was performed by using data from 1,700 monitoring wells in conjunction with the predictions from the CRGGCAD model. The CRGGCAD model serves two primary purposes: a. The Los Angeles Regional Water Quality Control Board sees CRGGCAD as the result of a unique cooperative effort among five major oil companies and b. The calibrated model is used to investigate a variety of specific remedial alternatives.
- Estimated the diluent (diesel) volume in the subsurface at a site in Guadalupe, Central California. The site is an oil field approximately 3,500 acres in size with 29 known pools of product within its boundaries. The "floating product" spread over an area of approximately 100 acres. The estimated volume was a critical element of the project as it was subject to close scrutiny by the regulatory agencies and the public. The Sacramento Bee covered this story extensively.
- Conducted research in the general area of biodegradation modeling/phenomena in groundwater as part of the United States Department of Energy's Subsurface Science Program. Developing and applying a fate and transport model capable of describing different biodegradation kinetics expanded the research. The developed model was used to examine the interaction of biodegradation, adsorption, advection, and dispersion in stratified porous media at Battelle's Pacific Northwest Laboratory, Richland, Washington.
- Wrote sections of the report entitled *Basinwide Instream Flow Assessment Model to Evaluate Flow Needs*, Bureau of Reclamation, US Department of Interior, Washington, D.C., published in November 1985. A probabilistic model was developed to incorporate hydraulic geometry relationships to average flow parameter values without the necessity of field observations. The results of the model were used to quantify sufficient or minimum flow needed to sustain the aquatic habitat is necessary for satisfactory resolution of water use conflicts and planning of water allocation strategies. Pool and riffle sequences from numerous streams in Central Illinois were correlated to drainage area, slope and other hydrologic variables.
- Wrote sections of the report entitled *Hydraulic Interaction of the Fox River with Shallow Aquifers*, Illinois State Water Survey, published in December 1986. The effect of switching from groundwater to surface water was examined for the community of Elgin by conducting detailed surface water measurements in the Fox River west of Chicago, Illinois. Water withdrawals from the deep sandstone aquifers were reduced because of steeply falling piezometric levels and declining water quality. The results of the analysis were used to properly manage the withdrawals of water from the Fox River and the groundwater aquifer beneath it.

- Supervised data collection and analysis for cost minimization analysis for surface water flow monitoring stations throughout New England for the U.S. Geological Survey, Water Resource Division. Results of the analysis were eventually used to support the elimination of forty percent of the active stations in the district. Also performed pumping and slug tests and installed groundwater monitoring wells at a peat bog located in the “down east” portion of the State of Maine.
- Directed water quality monitoring program of a sensitive salmon-spawning area in a brook that ran through the middle of a large interstate construction project for the Maine Department of Transportation. Developed a sediment transport model through the highway construction project in Brewer, Maine. Thousands of turbidity measurements were taken in Felt’s Brook and dozens of tributaries leading to it during the summer of 1983. Developed a model of the exposed fill erosion potential based upon stream turbidity data, rainfall intensity and duration, land and stream slopes, and other environmental data. The multi-variable nonlinear regression model of the construction area, turbidity measurements and other hydrologic variables proved useful to aid in the placement of erosion control equipment. Field responsibility was to inspect the integrity of various erosion control systems

Awards

Sir Francis T. Crowe Society, Distinguished Member with Medallion, University of Maine at Orono, May 2012 (for recognition of considerable engineering contributions and honor to the profession)

Young Civil Engineering Achievement Award, University of Illinois at Urbana-Champaign Civil Engineering Alumni Association. April 25, 1998.

Certificate of Excellence, City of Costa Mesa, California for Outstanding Performance and lasting Contribution to Stormwater Pollution Prevention, Presented by Mayor Gary Monahan, January 5, 2004.

Honors and Invited Speaking Engagements

- Invited Speaker, *An Evaluation of Indoor Air Sampling Procedures: Short Duration vs. Long Duration Sampling*, U.S.E.P.A Engineering Forum, February 3, 2010, Nationwide-All Regions Teleconference.
- Invited Speaker, *An Evaluation of Indoor Air Sampling Procedures: Short Duration vs. Long Duration Sampling*, U.S.E.P.A Region III Corrective Action Conference, Bedford, Pennsylvania, April 2, 2009.
- Invited Speaker, *An Evaluation of Indoor Air Sampling Procedures: Short Duration vs. Long Duration Sampling*, U.S.E.P.A Region IX, San Francisco, California, March 5, 2009.
- Invited Speaker, *Vapor Intrusion Evaluation and Sorbent Technologies: Soil Gas, Indoor Air and Passive/Active Approaches*, Environmental Engineering Seminar Series, Arizona State University, November 18, 2008.

- Guest Lecturer, Joint CEE 595W and CEE 595AG, Environmental Impacts from the Largest Gasoline Spill in U.S.A. History on the City of Dallas Water Supply-Lake Tawakoni, University of Illinois at Urbana-Champaign, Department of Civil and Environmental Engineering, October 19, 2007.
- Invited Speaker, Environmental Impacts from the Largest Gasoline Spill in U.S.A. History on the City of Dallas Water Supply-Lake Tawakoni, Center for Environmental Biotechnology, Biodesign Institute, Arizona State University, July 6, 2007.
- Invited Speaker, Osaka University, Japan, Department of Sustainable Energy and Environmental Engineering, History of Risk-Based Corrective Action (RBCA) development in the United States and Implications for Remediation, Cleanup Levels and Risk Assessment, May 31, 2007.
- Invited Speaker, Hokkaido University, Japan, Department of SocioEnvironmental Engineering, Environmental Remediation and Risk Assessment, May 22, 2007.
- Invited Speaker, CEE259A, Environmental Impacts from the Largest MTBE Release in History, University of California at Los Angeles, Environmental and Water Resources Engineering, May 2, 2006.
- Elected Councilor, Southern California Society for Risk Analysis, 2001-2003
- Invited Speaker, National Research Council (National Academy of Science and National Academy of Engineering), Water Science and Technology Board, Committee on Intrinsic Remediation. Title of Presentation “Implications of MTBE for Intrinsic Remediation of Underground Fuel Tank Sites”, March 12, 1998.
- Invited Speaker, Joint CEE 495W, Gateway Center Groundwater Treatment and Dewatering Facility, Los Angeles. University of Illinois at Urbana-Champaign, Department of Civil and Environmental Engineering, October 1997.
- Invited Speaker, Gateway Center Groundwater Treatment and Dewatering Facility, Los Angeles. Northwestern University, Department of Civil and Environmental Engineering, October 1997.
- Invited Speaker, Metz University, France and Virje University, Belgium, 1988.
- National Civil Engineering Honor Society (CHI EPSILON), 1984 - present.

University Teaching and Courses

- Spring 2007, Research Center for Environmental Quality Management, Kyoto University, Japan. Air Testing, Water Supply and Natural Attenuation Lectures.
- Spring 1995, University of California at Irvine, Department of Civil and Environmental Engineering, CE280, Computational Methods and Software.
- Fall 1988, University of Illinois at Urbana-Champaign, Department of Civil and Environmental Engineering, CE357, Groundwater Hydrology and Hydraulics.
- Fall 1987, University of Illinois at Urbana-Champaign, Department of Civil and Environmental Engineering, CE343L, Water Chemistry Laboratory.

Public and Corporate Workshops

- Lorman Training Webinar. Groundwater Contamination Principles and Remedies. July 22, 2015. Attorney (CLE Credit 1.5 hr), Architect and Engineer Continuing Education.

- Lorman Training Webinar. Avoiding the Pitfalls Around Vapor Intrusion and Site Liabilities. April 22, 2015. Architect and Engineer Continuing Education.
- April 17-18, 2000. Fossil Fuels, Diesel and MTBE. Mealy's Toxic Torts Conference: Plaintiffs, Defense and Expert Perspectives. West Palm Beach, Florida.
- November 15-16, 1999. Bioremediation and MTBE. Mealy's UST and MTBE Litigation Conference. Amelia Island, Florida.
- December 9, 1998. Applying Enhanced Natural Attenuation to Petroleum. Workshop entitled "Enhancing the Natural Attenuation Process", Third Day of Conference Sponsored by International Business Communications. Pasadena, California.
- Spring 1994, Levine-Fricke: Engineers, Hydrogeologists & Applied Scientists, Evening Training Sessions on the topics of Soil and Groundwater Transport Processes and Site-Specific Cleanup Level Determination. ASTM ES-38 RBCA, API's Decision Support Software (DSS) and the CalTOX models were covered.

Published Interviews

- Environmental Solutions. December 2006, American Chamber of Commerce Japan, Volume 43, Issue 12, authored by Nicole Fall.
- RBCA: Boon to Brownfields, But No Magic Bullet. March 27, 1997. The Brownfields Report, BFR Volume 2, Number 6, authored by Debra A. Schwartz.
- MTBE Case Casts Doubt On Letting LUST Sites Be. March 1, 1997. The Bio-Cleanup Report, authored by Debra A. Schwartz.

Large Equipment-Based Loan -Basis for Decision

Odenchantz, J.E. and K.M Carroll. Spansion Japan, Ltd., Environmental Review (Silicon Wafer Manufacturing Facility: 30-acre site), Prepared for GE Capital Solutions dated April 27, 2007. Loan amount: ~\$700 million.
