1 Duane C. Miller, #57812 **Exempt from Filing** Victor M. Sher, #96197 And Motion Fees A. Curtis Sawyer, Jr. #101324 [Govt. Code, § 6103] MILLER, SHER & SAWYER A Professional Corporation 100 Howe Avenue, Suite S120 Sacramento, CA 95825 Telephone: (916) 924-8600 Facsimile: (916) 924-3426 Gary M. Kvistad, #121869 HATCH & PARENT 21 East Carrillo Street Santa Barbara, CA 93101 Telephone: (805) 963-7000 Facsimile: (805) 965-4333 9 Attorneys for Plaintiff 10 South Tahoe Public Utility District SUPERIOR COURT OF THE STATE OF CALIFORNIA 11 12 IN AND FOR THE COUNTY OF SAN FRANCISCO 13 SOUTH TAHOE PUBLIC UTILITY NO. 999128 DISTRICT: 14 EXPERT WITNESS DECLARATION Plaintiff. 15 PURSUANT TO CODE OF CIVIL PROCEDURE SECTION 2034(f)(1) 16 ATLANTIC RICHFIELD COMPANY 17 ("ARCO"); ARCO CHEMICAL COMPANY; SHELL OIL COMPANY; 18 let al., 19 Defendants. 20 21 I, DUANE C. MILLER, declare as follows: 22 1. I am an attorney duly licensed to practice law in the State of California and am one of the attorneys representing the plaintiff herein. The following declaration is based on personal 24 knowledge imparted to me by the respective experts and by other members of our firm. However, 25 to the best of my knowledge the following statement is accurate for each disclosed expert. 26 **Hydrogeology** 27 1. Steven Wheatcraft, Ph.D. is an expert in hydrogeology and solute transport. Dr. 28 Wheatcraft will testify concerning the characteristics of MTBE, its capacity to cause significant Expert Witness Declaration Pursuant to Code of Civil Procedure Section 2034(f)(1)

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$250 per hour. His consultation fee is \$250 per hour.

2. Graham Fogg is an expert in hydrogeology and the persistence of contaminants in groundwater systems. Dr. Fogg will testify concerning the characteristics of MTBE, its capacity to cause significant groundwater contamination problems with public drinking water supply wells, movement of contaminants in groundwater, including MTBE, the persistence of MTBE and other gasoline contaminants in groundwater, and the role of Tahoe gasoline releases in causing long-term contamination and/or threatened contamination of plaintiff's wells. He will also testify regarding the impact, if any, of defendants' remediation efforts at various gasoline stations on the concentration of MTBE in Tahoe groundwater. Dr. Fogg is a co-author of the University of California Health and Environmental Assessment of MTBE chapter which discusses impacts on water quality. This report has been produced in discovery. Dr. Fogg will discuss his report and his recommendations concerning MTBE.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$300 per hour. His

3. <u>Joseph Odencrantz</u>, <u>Ph.D.</u>, <u>P.E.</u> has a Ph.D. in civil and environmental engineering and experience in the assessment, remediation, and monitoring of petroleum hydrocarbon contamination, as well as the analysis of the fate and transport of constituents of gasoline in groundwater systems. Dr. Odencrantz will testify concerning his estimate of the amount of MTBE released at various Tahoe gasoline station sites, the movement of MTBE in Tahoe groundwater, the feasibility, if any, of bioremediating MTBE contamination in Tahoe groundwater and the likelihood, if any, that MTBE released into groundwater will be naturally attenuated. He will also discuss the nature and extent of MTBE groundwater contamination and the impact of MTBE on Risk Based Corrective Action.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$300 per hour. His consultation fee is \$225 per hour.

4. <u>Ken Schmidt, Ph.D.</u> is a hydrogeologist and expert in well construction and design who has evaluated the South Lake Tahoe aquifer and the feasibility of developing new drinking water supplies by drilling wells in the Tahoe basin. Dr. Schmidt authored a chapter on the abovementioned subject in the Boyle Engineering report previously produced in discovery. Dr. Schmidt will discuss the subjects covered by that report.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$210 per hour. His consultation fee is \$210 per hour.

5. <u>Christian R. Wessel</u> is a hydrogeologist who has developed a numerical groundwater model of the South Lake Tahoe basin which has been previously produced in discovery. This witness will discuss the appropriate use of this model to understand the South Lake Tahoe aquifer

and the associated effects of pumping plaintiff's drinking water wells.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$133.50 per hour. His consultation fee is \$89 per hour.

Impacts of MTBE on Drinking Water Quality

6. <u>Dr. William S. Cain</u> is an expert in human sensory perception associated with the Chemosensory Perception Laboratory of the University of California, San Diego. Dr. Cain will discuss scientific principles associated with human sensory perception, methods used to estimate taste and odor thresholds, variability in human sensitivity to unpleasant tastes and odors, the impact of MTBE contamination on the taste and odor of drinking water, and studies on MTBE, including taste and odor studies.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$250 per hour. His consultation fee is \$250 per hour.

7. <u>Dr. Irwin "Mel" Suffit</u> is a professor with the University of California, Los Angeles. He will testify concerning treatment technology which can be used to remove MTBE from drinking water, scientific studies performed on carbon absorption rates associated with the removal of MTBE from drinking water, and the impact of MTBE on the taste and odor of drinking water.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$300 per hour. His consultation fee is \$300 per hour. This expert was unavailable to confirm that this rate represents his current hourly rate and, therefore, this disclosure may be amended.

8. Bernard D. Goldstein, M.D. is a medical doctor with expertise in the environmental and occupational heath sciences, public health, toxicology, and epidemiology. He will discuss available data concerning the toxicology and potential carcinogenicity of MTBE and the adequacy of studies on MTBE conducted by industry to date, as well as the public health risk associated with human exposure to MTBE.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$500 per hour, \$4,000 per day. His consultation fee is \$500 per hour and \$4,000 per day with a \$5,000 minimum.

Air Quality

9. Robert Sawyer, Ph.D. is an expert on air pollution, air pollutant emissions and their control, the chemistry of combustion processes and fuels, and air pollution regulatory policy. He will testify concerning effects of using MTBE and/or other oxygenates in gasoline, including its impact on air quality. Dr. Sawyer is a co-author of the University of California Health and Environmental Assessment of MTBE chapter which discusses impacts on air quality and a member of the EPA Blue Ribbon Panel on MTBE. These reports have been produced in discovery. Dr. Sawyer will discuss his recommendations concerning MTBE and the subjects mentioned in the reports.

Dr. Sawyer has agreed to testify at trial. He will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning his specific testimony, including any opinion and its basis, that he is expected to give at trial.

Dr. Sawyer's normal consulting fees are \$180 per hour with a five day minimum, and \$360 per hour for testifying at depositions or in court.

10. <u>Donald Lucas, Ph.D.</u> is a staff scientist in the Environmental Energy Technologies Division of the Lawrence Berkeley Laboratory, where he is a Principal Investigator in the Combustion Group. He also has an appointment as a Professional Research Scientist in the

7

28

27

School of Public Health and as an affiliate in the Energy and Resources Group at the University of California, Berkeley. His areas of expertise are combustion generated air pollutants, experimental chemical kinetics, and combustion chemistry. He will testify concerning the air pollution effects of using MTBE and/or other oxygenates in gasoline. Dr. Lucas is a co-author of the University of California Health and Environmental Assessment of MTBE chapter which discusses impacts on air quality. This report has been produced in discovery. Dr. Lucas will discuss his recommendations concerning MTBE and the reports.

Dr. Lucas has agreed to testify at trial. He will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning his specific testimony, including any opinion and its basis, that he is expected to give at trial.

Dr. Sawyer's normal consulting fees are \$180 per hour with a five day minimum, and \$360 per hour for testifying at depositions or in court.

11. Michael Graboski, Ph.D. is an expert in pollutant emissions, refining, California gasoline, and ethanol. He will testify concerning the emissions effects of using MTBE in California gasoline, the availability of alternatives to MTBE, including ethanol, and refining issues related to these topics. Dr. Graboski has agreed to testify at trial. He will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning his specific testimony, including any opinion and its basis, that he is expected to give at trial.

Dr. Graboski's normal consulting fees are \$250 per hour, and \$500 per hour for testifying at depositions or in court.

Gasoline Storage Systems and Releases

12. Marcel Moreau is a geologist with nationally recognized expertise in underground tank lissues. He will discuss technology and operational practices which can be utilized to prevent and/or promptly detect releases from gasoline storage systems. In addition, Dr. Moreau will discuss the nature, extent, and cause of gasoline releases at individual stations in Lake Tahoe and how those incidents could have been prevented. Dr. Moreau will also review the effectiveness of leak detection technology used for gasoline storage systems and their limitations. Dr. Moreau will describe early reports concerning MTBE contamination incidents, the historical development of

knowledge concerning MTBE's occurrence in groundwater and drinking water, and defendants' knowledge of these subjects.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$200 per hour. His consultation fee is \$150 per hour with a \$2,000 minimum.

Other Gasoline Alternatives

13. Robert Reynolds is the President of Downstream Alternatives Inc. He is an expert in – and will testify concerning – the use of ethanol in gasoline as an alternative to MTBE, including ethanol's supply, demand, logistics, and availability for use in California refineries.

Mr. Reynolds has agreed to testify at trial. He will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning his specific testimony, including any opinion and its basis, that he is expected to give at trial.

Mr. Reynold's fee is \$175 per hour.

Gasoline Deliveries

14. <u>Ken Kross</u> has extensive experience with the distribution and movement of gasoline in California through the use of pipelines and terminals. He will testify concerning tracing shipments of gasoline from Bay Area refineries to Tahoe gasoline stations and the practices and paperwork employed by the industry concerning this subject.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$100 per hour. His consultation fee is \$100 per hour.

15. <u>James W. Barrington, P.E.</u> is an engineering consultant who specializes in many aspects of the oil and chemical industry, including process design, plant layout and construction, storage and transportation facilities, and pipelines. He will discuss the movement and delivery of

gasoline in pipelines and terminals.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$300 per hour. His consultation fee is \$150 per hour.

Remediation Engineering/Water Systems

Fresno, California. Mr. Redlin was the project manager responsible for the preparation of "MTBE Water System Impacts and Mitigation Evaluation", September 2000, prepared by Boyle Engineering Corporation, which reviewed the District's existing water system, MTBE impacts on the District's water system, various alternative remediation strategies to mitigate the impacts of MTBE (including, but not limited to, well reconstruction/rehabilitation, blending, purchasing water, development new groundwater or surface water supplies, and/or the installation of wellhead treatment facilities to remove MTBE from the water supplied to the District's customers. This report has been produced in discovery and Mr. Redlin will discuss the subject matter covered by the report, as well as his recommendations concerning the District's response to MTBE contamination of its drinking water (including the damages sustained by the District, the cost of installing and operating treatment technology and other remedial options discussed above). Mr. Redlin will also discuss water industry standards and regulations and their impact on his recommended MTBE mitigation alternatives.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$200 per hour, and his consultation fee is \$165.00 per hour.

17. Anthony Brown is an expert in the fields of hydrogeology, gasoline releases, and remediation of gasoline releases. He has participated in scientific studies in the removal of MTBE

in drinking water supplies (including, but not limited to) charcoal filtration, advanced oxidization processes, resin filtration, etc. He will testify concerning the effectiveness and cost of various technologies to remove MTBE from drinking water and discuss gasoline releases in Tahoe and remediation efforts undertaken at Tahoe gasoline stations.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$376 per hour. His consultation fee is \$188 per hour.

18. Alice Tulloch is an engineer who has been responsible for the administration of a public drinking water system in California. She will discuss public drinking water systems, wells, standards applicable to the water industry, and the operations and maintenance of treatment systems designed to remove contaminants from public drinking water supplies.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$200 per hour. Her consultation fee is \$140 per hour.

Sewers

19. <u>John Calmer</u> is an engineer with expertise in public sewer systems. He has performed ex-filtration and infiltration studies on the District's sewer system which have been produced ind discovery and which will be discussed by the witness. He will also discuss the occurrence and significance of MTBE discharges from remediation facilities at various Tahoe gasoline stations and the reasons that MTBE has been detected in District sewers.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$250 per hour. His

Economists

20. W. Ed Whitelaw is an economist and will discuss the present value of the damages sustained by the District and the District's damages. In any bifurcated proceeding, he may also testify concerning the defendants' financial statements and net worth in a proceeding to determine the appropriate amount of punitive damages.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$290 per hour. His consultation fee is \$290 per hour.

Chemistry

21. Jim Bruya, Ph.D. is an environmental chemist with expertise in the identification of petroleum hydrocarbons and other constituents of gasoline and will testify concerning the subject of product identification and defendants' role in supplying gasoline and/or MTBE which can cause contamination at Tahoe sites.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$150 per hour. His consultation fee is \$150 per hour.

22. Jill B. Henes, Ph.D. is a chemist and a specialist in quality assurance, procedures and practices associated with the quantitative analysis of organic and inorganic pollutants. She has participated in a laboratory audit to determine the adequacy of laboratory operations at Zymax Envirotechnology, Inc. and Alpha Analytical Laboratories and the practical and technical feasibility of detecting MTBE in groundwater samples. Her report concerning this audit and her findings that MTBE can be reliably detected by the laboratories mentioned above at concentrations as low as 0.2 parts per billion has been produced in discovery and will be covered by her testimony.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$294 per hour. Her consultation fee is \$147 per hour.

23. Roger Scholl, Ph.D. is a chemist with Alpha Analytical Laboratories that has performed water quality analyses on samples provided by the District. The associated reports have been produced in discovery. Dr. Scholl will testify concerning the amount of MTBE and other constituents detected in such samples and the reliability and accuracy of the methods used to perform such analyses.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$300 per hour. His consultation fee is \$150 per hour.

24. John McMurphy and Mike Ng are chemists with Zymax Envirotechnology, Inc. that have performed water quality analyses on samples provided by the District. The associated reports have been produced in discovery. These witnesses will testify concerning the amount of MTBE and other constituents detected in such samples and the reliability and accuracy of the methods used to perform such analyses.

Counsel represents that the aforenamed experts have agreed to testify at the trial of this matter. Counsel represents that the aforenamed experts will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned experts' fee for providing deposition testimony is \$350 per hour.

Their consultation fee is \$150 per hour.

Statistics

25. <u>John Freeman, Ph.D. and Michael Sullivan, Ph.D.</u> are statisticians who will critically review and comment on any statistical analyses presented by defendants' experts in this case and

may testify concerning the presence or absence of statistically significant trends concerning the concentration of MTBE in Tahoe groundwater.

Counsel represents that the aforenamed experts have agreed to testify at the trial of this matter. Counsel represents that the aforenamed experts will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned experts' fee for providing deposition testimony is \$400 per hour. Their consultation fee is \$300 per hour.

Land Acquisition Costs

26. Stephen Johnson is a certified real estate appraiser who will testify concerning the cost of acquiring land associated with MTBE remediation facilities and associated damage claims by the District.

Counsel represents that the aforenamed expert has agreed to testify at the trial of this matter. Counsel represents that the aforenamed expert will be sufficiently familiar with the pending action to submit to a meaningful oral deposition concerning any opinion and its basis.

The aforementioned expert's fee for providing deposition testimony is \$175 per hour. His consultation fee is \$150 per hour.

Percipient Witnesses Who May Offer Expert Opinions

In conformity with the requirements of the Code of Civil Procedure, no hourly rate is listed for these witnesses unless they charge for such services.

27. Ivo Bergsohn is a hydrogeologist who will testify concerning District wells, the geology, lithology, and occurrence and movement of groundwater in the District's service area, as well as the results of pumping tests and other studies performed on behalf of the District which are described in numerous documents produced in discovery and in his lengthy deposition. These subjects include the characteristics of MTBE, its capacity to cause significant groundwater contamination problems with public drinking water supply wells, movement of contaminants in groundwater, to what extent MTBE impacted and/or threatens the District's water supply, and the decision to remove MTBE impacted/threatened wells from service. He will also discuss hydrogeological issues (geology, lithology, porosity, groundwater velocity flow and direction and

related subjects), the area used by the South Lake Tahoe Public Utility District to supply water to its customers, and the origin of MTBE plumes which affect the District's water supply.

- 28. Richard Solbrig is an engineer who will testify concerning the construction, operation, and maintenance of the District's water system and sewer system, as well as the anticipated cost of constructing facilities in Tahoe, including MTBE remediation alternatives discussed in Boyle Engineering's report on this subject. He will also describe the District's construction practices and policies, as well as applicable environmental laws and regulations which affect such projects and their associated cost. He will testify generally on subjects covered by his deposition in this action.
- 29. Richard Hydrick is the District's Water Quality Manager who will testify concerning the construction, operation, and maintenance of the District's water system, decisions made by the District with respect to MTBE, and threatened and actual impacts of MTBE on District wells and their operation. He will testify concerning subjects covered in fourteen days of deposition, including damages sustained by the District attributable to MTBE, and his recommendations concerning projects to remediate District wells impacted by MTBE.
- 30. Rhonda McFarlane is the Chief Financial Officer employed by the District and will testify concerning the District's accounting and cost allocation practices and records and the amount of damage sustained by the District to date, as well as subjects covered in her deposition.
- 31. Robert Baer is the General Manager of the South Tahoe Public Utility District who will testify concerning the construction, operation, and maintenance of the District's water system, decisions made by the District with respect to MTBE, and threatened and actual impacts of MTBE on District wells and their operation. He will testify concerning subjects covered in fourteen days of deposition, including damages sustained by the District attributable to MTBE, and his recommendations concerning projects to remediate District wells impacted by MTBE.
- 32. <u>Terrance Powers</u> is responsible for sampling District wells and monitoring water quality. He will testify concerning subjects covered in his deposition as well as standard practices followed by the District in obtaining representative samples in its wells.
- 33. <u>Phillip Torney</u> is responsible for the operations and maintenance of the District's water system and District wells and will testify concerning these subjects and subjects covered in his

34. Ross Johnson and Ken Schroeder are responsible for the operation of the District's sewer system and will testify concerning that subject and subjects covered in their depositions.

- 35. <u>David Herzog</u> conducted an aquifer study used to identify appropriate sites for the construction of several District wells, including, but not limited to, the Paloma well. In addition, he participated in an investigation of MTBE contamination in the Meyers area. His reports have been produced in discovery and will be covered by his testimony. This consultant charges \$150 per hour for consultation and deposition testimony.
- 36. Steve Linder and Greg Lavato are employed by the United States Environmental Protection Agency, Region 9, San Francisco. They reviewed consultants' reports and other data concerning gasoline releases at USA Gasoline Station No. 7, Tahoe Tom's, and other sites and have commented upon the adequacy of remediation efforts, or the lack thereof, conducted at those facilities. They will testify concerning the analyses and work they performed in this regard.
- 37. Mary Drewry participated in the State Water Resources Control Board's panel on the leak history of new and upgraded UST systems dated January 1999 which was produced in discovery in this case. She will testify concerning her findings and observations of the inspection performed by the team on various Tahoe gasoline stations, including Paradise Chevron, Terrible Herbst, USA Gas No. 7, Meyers Beacon, and other sites listed in that report. She will describe any deficiencies and/or problems identified during the inspection, as well as the state requirements applicable to gasoline storage systems.
- 38. Ginger Huber, Valerie Kaufman, and Marcie Barnett are or were employed by the County of El Dorado to enforce environmental rules and regulations applicable to underground storage tank systems and their components. They have conducted numerous inspections of Tahoe gasoline stations and will comment upon their findings, observations, and opinions concerning the events and conditions observed. In addition, they will identify and explain photographic evidence relating to these observations and conditions and the compliance, or lack of compliance, by defendants with applicable standards and regulations.
 - 39. Dennis C. DeCota is the Executive Director of the California Service Station and

1	Automotive Repair Association (CSSARA), and has more than 30 years experience in petroleum
2	service station sales, including 12 years as a Merchandising Sales Supervisor for Unocal
3	Corporation and a franchisee of Tosco service stations. He is knowledgeable regarding different
4	types of service stations in California (e.g., franchise stations, jobber stations, two-party stations,
5	unbranded stations, and major oil company owned and operated service station dealers), the
6	relationship of those stations to various refiners and suppliers of gasoline, and documentation
7	and/or other information provided by refiners and suppliers concerning gasoline. In addition, Mr.
8	DeCota has conducted a survey of CSSARA members regarding warnings and other information
9	received by service station dealers specifically concerning MTBE. He is currently the Chief
10	Executive Officer of a professional organization which represents franchised service station
11	dealers, unbranded service station dealers, and other members of the retail service station business
12	Mr. DeCota will testify generally concerning the subject matter of his affidavit dated September
13	23, 2000 in Communities for a Better Environment v. Unocal Corporation, et al., including, but
14	not limited to, the lack of warnings provided concerning MTBE to owners and operators of
15	gasoline service stations, and the need for such warnings.

27

28

- 40. <u>Dickman Lum</u> is employed by the California Air Resources Board Compliance Division in Sacramento and will testify concerning the defendants' ability to trace shipments from a refinery to a terminal, and will describe associated records and the records which the defendants are required to maintain by state law.
- 41. Harold Singer (Engineer/Geologist); Chuck Curtis (Engineer); Lisa Durnback (Geologist); Lorie Kemper (Engineer); Catherine Schoen (Engineer); and Tammy Lundquist (Geologist) are employed by the Lahonotan Regional Water Quality Control Board in South Lake Tahoe, California. They have identified gasoline releases at Tahoe gasoline stations at issue in this case and determined the cause of these releases. In addition, they have reviewed reports prepared by environmental consultants concerning remediation activities undertaken at these stations and have determined that some potentially responsible parties have failed to comply with orders issued by the Regional Board which were designed to reduce MTBE impacts on Tahoe groundwater.
 - 42. Kerri Dierberger prepared reports on behalf of her employer, Camp, Dresser & McKee

concerning remediation of a gasoline release at Tahoe Tom's. She may testify concerning her reports and a description therein of the expected level of remediation/removal associated with soil vapor, air sparging, excavation, pump and treat, and other remedial techniques described in her reports. This witness' hourly rate should be available through counsel for Tom Erickson who currently retains this consulant.

- 43. Dale Bugenig was formerly employed by AGRA Earth and Environmental and he developed on a numerical groundwater model of the Tahoe basin on behalf of the District. This model and associated reports have been produced in discovery and will be covered by this witness' testimony.
- 44. <u>Duane Bordvick</u> is a Vice-President employed by Tosco Corporation who testified in his deposition that MTBE did not significantly improve air quality and that other practical alternatives were available. This testimony may be elicited at trial.
- 45. Terry Applebury is employed by Applied Process Technology and has evaluated the feasibility of using advanced oxidation processes to treat MTBE in District wells. Copies of his reports relating to this subject have been produced in discovery and will be discussed in his deposition.
- 46. Jeff Collins is an environmental engineer employed by SECOR International, Inc. who testified in his deposition concerning the source of MTBE found in the Arrowhead wells. This testimony will be elicited at trial.
- 47. Japanese Language Translator. Plaintiff may call a court certified translator from SCITRAN, or other court certified translator, if necessary, in support of a verified translation of the Fujiwara article on Biodegradation and Bioconcentration of Alkyl Ether. Plaintiff is disclosing this potential witness, even though a translator is not classified as an expert under California Evidence Code section 750, et seq.
- 48. Kenneth Roy Williams conducted a study concerning over 300 gasoline station sites in Orange County and will describe the nature and extent of MTBE contamination found, MTBE concentration trends over time, ongoing releases from upgraded gasoline storage systems, the involvement of certain defendants in these releases and their knowledge of the presence of MTBE

at these sites.

Defendants' Employees and/or Former Employees

Who Offered Opinions During Their Depositions

Plaintiff expects to utilize some or all of the deposition testimony of the following witnesses taken in this action who are currently employed or formerly employed by one or more defendants. Their addresses and fields of expertise are described in each deposition which is incorporated herein by reference. Since the depositions are equally available to all parties, a more specific description of the subject matter and testimony of their opinions is not required. However, such subjects include, but are not limited to, MTBE's impact on drinking water and groundwater, MTBE's biodegradability – or lack thereof, the efficacy of MTBE in improving air quality, the availability of reasonable alternatives to MTBE, including ethanol and iso octane, the nature and extent of the oil industry's knowledge of the MTBE problem, the nature and extent of warnings provided to others concerning MTBE, the propensity of underground storage tank systems and related pipelines to release gasoline, identification of handwritten entries on business records, identification of business records and business practices, whether District wells should be operated when plumes are near a District well, industry standards concerning the operation, maintenance and construction of underground gasoline systems and the effectiveness of such practices and procedures, the taste and odor threshold for MTBE, reporting requirements under the Toxic Substances Control Act, the toxicology of MTBE, and sources of MTBE contamination in the Tahoe area. These witnesses include:

Bruce Bauman
Duane Bordvick
Dr. Roland Borey
Brad Boschetto
Timothy Buscheck
David Camille
Eugene Capaldi
Chen Chiang
Dwayne Conrad
Paul Cuneo
Sullivan D. Curran
William Deever
James DeJovine

PROOF OF SERVICE BY MAIL

I, the undersigned, declare that I am, and was at the time of service of the paper(s) herein referred to, over the age of 18 years and not a party to this action. My business address is 100 Howe Avenue, Suite S120, Sacramento, California 95825, which is located in the county in which this mailing occurred. I am familiar with my office's business practice for collection and processing of correspondence for mailing with the United States Postal Service, and under such practice the correspondence would be deposited with the United States Postal Service, postage prepaid, the same day in the ordinary course of business.

On October 18, 2000, I served EXPERT WITNESS DECLARATION PURSUANT TO CODE OF CIVIL PROCEDURE SECTION 2034(f)(1) on the following persons or parties by placing a true copy thereof in a sealed envelope, showing the addresses set forth below, for collection and deposit in the United States Postal Service on that date following ordinary business practices:

See Attached for List

I declare under penalty of perjury under the laws of the State of California and the United States of America that the foregoing is true and correct.

Executed on October 18, 2000 at Sacramento, California.
